

Time Card - Localized

Time card works in both localized and non-localized mode.

Overview

When localized, you can press and hold on the Time Card icon and a message will appear at the bottom to give you the amount of time you've been localized at the current store. This can be seen below, right - and is a handy way to check in on time. Pressing normally on the Time Card will bring you to a summary of your work time for the current date, the prior day and the weekly payroll period. At the end of your day - you will want to review your time card and choose either "Accept" or "Contest" the time and mileage. This allows the manager to follow up with the merchandiser if its contested or allows the time to be submitted for payroll.
