

Walmart AS2 Custom Reporting Integration!

Call 2020 the year of the integration - we've implemented the ability to extend integration beyond EDI with Wal-Mart's AS2 reporting integration. What is this? Put simply its the ability to have any report from RetailLink sent to us and we can integrate the data directly into your account. EDI data is good, but as many people know sometimes the data in Retail Link changes "after the fact" - which is weird, by the way, but it happens. The only way to solve this is to integrate using RetailLink and their AS2 report delivery! By doing so you can overcome data changes, ensure accuracy and augment or replace the EDI data if needed, very simply. Our systems are ready to accept reports - integration typically takes 1-2 weeks! Oh, and there is no extra charge for up to 3 integrated reports!
