

Efficiency Insights

Overview

This handy little suite of insight panels is focused on helping you recall exact reports you have previously run, which helps you save time. Avantalytics robust reporting system can have dozens of metrics you can choose from while crafting the exact report you need. So, while powerful, it can be difficult to remember exactly how to recreate the wheel every time you want to re-run a certain type of report. These panels make it easy for you to find reports that you like to run quickly and easily.

Insight Panels covered in this documentation section include:

- [Recent Reports](#)
- [Most Run Reports](#)
- [Favorite Reports](#)
